

# AASHTOWare Project Data Analytics™

Make better, more informed decisions with **AASHTOWare Project Data Analytics**. Quickly analyze patterns for irregularities, through graphical and tabular displays built specifically for highway construction data analysis.

- Integrated with the AASHTOWare Project software and built to maximize the potential of the AASHTOWare Project **unified database**
- Breaks down departmental silos by using and analyzing **all data** from the estimate, letting, bids, construction, materials, civil rights and labor
- Accessible from **anywhere, mobile-friendly**
- Interactive analysis tools built specifically for agency construction management business needs
- Agencies will be able to respond more **quickly and accurately** to citizen, legislative, and vendor requests with user-friendly tools accessing current data
- Future planning is improved, as it can be based on current, broader sets of information that are more **accurate**
- Use of **industry-standard** third-party tools for additional analysis, visualization, and reporting
- Minimal user training, with a low-complexity product and **simple navigation**
- Use of the **Software-as-a-Service (SaaS)** platform keeps the product at the latest production version and the technology remains current
- Agencies are **no longer required** to license the SAS statistical analytical tool
- A **rapid delivery** model allows new features to go live quicker
- No agency deployment needed as the SaaS is in a **hosted environment**, minimal IT support
